

Suitable environment for Loy Krathong in mars

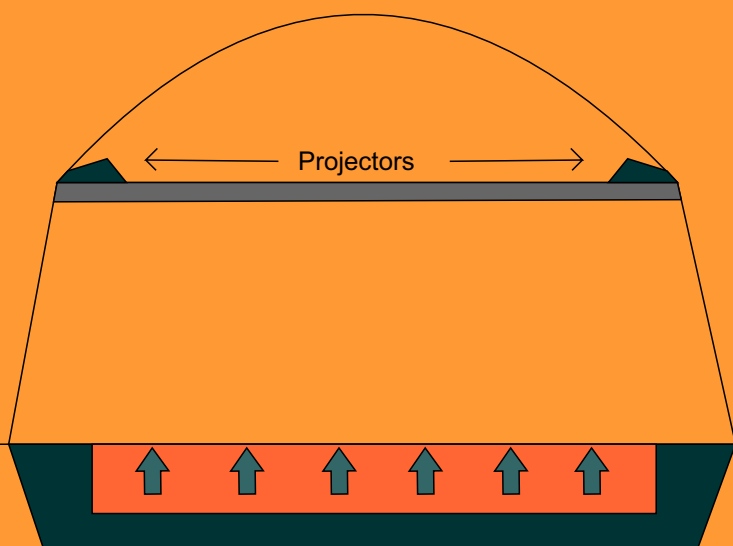

in the top of the dome, there is a projector to projecting the bright night sky of 12th thai months, even though we can't see the real full moon on mars, but we can see the projection on the top of the dome as a representative of full moon

Top view

Instead of using water, I used the most of the mars element, which is sand/soil. I used martian soil as the medium. because it was very difficult to find much water on mars.

3D view

Air Compressor

by using big air compressor in the bottom of the dome and forcing some constant flow of air to upward, it will create the fluidization effect because of the air flow that reduce the friction of the sand, and making it appear and behave like liquid
